

Anushka Jain

San Francisco Bay Area | jain.anushka.tech@gmail.com | 240-355-0262 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Skills

Programming: SQL (CTEs, Window Functions), Python (pandas, NumPy, scikit-learn, matplotlib, PySide6), R, PySpark
Analytics & Statistics: A/B Testing, Hypothesis Testing, Regression Analysis, Clustering, Forecasting, Customer Segmentation, Exploratory Data Analysis, Data Quality, KPI Monitoring
Cloud & Data Platforms: Snowflake, dbt, Azure Databricks, Azure Data Factory, AWS, Airflow, Git, JIRA
Visualization: Tableau, Power BI, Seaborn, Plotly, Excel (Advanced, Pivot Tables, XLOOKUP), Google Sheets

Experience

Armada Analytics, Data Analyst – Automation April 2026 – Present

- Designed and shipped internal automation integrating Azure OpenAI / LLM agents into reporting workflows, cutting manual analyst effort 50%, end-to-end AI workflow redesign with measurable efficiency gains
- Designed a portfolio-wide P&L dashboard (Plotly) that unified revenue and expense data into a single view, replacing manual property-by-property analysis for stakeholder reporting

Walmart, Data Analyst – Forecasting (Capstone Project) Sept 2025 – Dec 2025

- Built a scalable inbound demand forecasting pipeline across 100+ stores using ensemble time-series models, achieving 6.6% MAPE with less than 1% bias, projected to **eliminate 30+ hours/week manual labor planning**
- Deployed an LLM-powered Agentic AI interface enabling store managers to query operational forecasts directly via natural language - demonstrating end-to-end AI agent development in a real-world operational setting

University of Florida, Product Intern | *Gainesville, Florida* Jun 2025 – Aug 2025

- Modeled peer interaction dynamics in early childhood classrooms using temporal network analysis (T-GERGM) in Python, enabling researchers to quantify the formation of social structures, migrating the analysis pipeline from R for reproducibility

Tredence Inc. | *Bengaluru, India*

Senior Data Analyst – Customer Analytics Jan 2024 – Jul 2024

- Designed and ran A/B tests on retention and targeting campaigns across 10M+ customers, measuring lift and translating results into targeting decisions; built churn-prediction and segmentation models (logistic regression, K-means) that surfaced at-risk and high-value cohorts
- Built a Medallion-architecture Customer Data Mart in Azure Databricks, consolidating customer, sales, and operations data, **reducing query runtime by 20%** and enabling faster insights across analytics, finance, and product teams
- Deployed automated data quality and monitoring frameworks in PySpark with CI/CD pipelines, **improving data accuracy by 30%** and establishing reliable single source of truth for operational reporting
- Owned and optimized SQL-based ETL pipelines for high-volume datasets, ensuring consistent data transformation

Data Analyst – Retail & Marketing Analytics Jul 2022 – Dec 2023

- Led a 5-person analytics team building demand-forecasting and inventory models that cut cart abandonment and order cancellations 15%, directly improving conversion through checkout.
- Designed automated KPI monitoring and anomaly detection frameworks (Python, SQL) to proactively identify performance deviations and operational bottlenecks, reducing insight generation time by 15%

Projects

Airbnb Listing Rating Prediction Model [GitHub](#)

- Engineered 45+ structured and text-based features (TF-IDF, sentiment analysis); built classification models (XGBoost, LightGBM) achieving 76% accuracy, 80% AUC, and <10% false positive rate, enabling hosts to identify key drivers of ratings and improve listing performance

Qatar Tourism Tableau Dashboard [Tableau Link](#)

- Built an interactive Tableau dashboard analyzing 10 years of tourism data, surfacing trends in visitor spending patterns, regional travel behavior, and seasonal demand to inform strategic planning decisions

Education

M.S. Business Analytics, University of Maryland Aug 2024 – Dec 2025

- Coursework:** Data Mining, Predictive Analytics, Cloud Computing, Database Management Systems, Price Optimization

Bachelor of Technology, Biotechnology, Manipal Institute of Technology Jul 2018 – Jun 2022
